KODI KLIP Demonstration

Recently, AIRMATIC Account Manager Todd Monahan delivered a KODI KLIP® demonstration to a precast concrete plant in Eastern, PA, to illustrate the benefits of using the patented KODI KLIP system as compared to hand-tying with tie-wire.

All attendees were very impressed with the KODI KLIP system, and Todd has made plans to visit multiple job sites in the future, which we hope will lead to more KODI KLIP converts!

KODI's innovation lies in its non-corrosive polycarbonate Klips that capture rebar at all four corners of the cross-section, eliminating worker cuts, abrasions and lost time injury. In addition to producing faster, safer and more consistent connections, the grip strength of the Klips prevents racking and swaying when lifting and moving rebar mats into place.

If you're interested in learning more about KODI KLIP, give us a call at **215.333.5600**, or send an email to **infocenter@airmatic.com**!
